

## AG-12 Concised. Compact Iceman Ageing Bath ASTM D4870-IP 375

## Small. Yet Powerful.

Every new AG-12 has been built on stainless-steel material, designed for long lasting durability. It is empowered with a temperature circulator ranging from 5 to 120 degree celsius.

AG-12 is also equipped with a low liquid level protection - you don't have to worry burning away your aging bath ever again!

Renn aging bath comes in two models - twelve (AG-12) and twenty-four (AG-24) holes. Choose a model that meet your needs.
