

## RTS-01 Efficient. Productive. Neat. Renn Total Sediment Tester

ASTM D4870-IP 375, BS 2000 Part 375, IP 390 (Procedure A), ISO 10307

## Precise Control. Even Within.

Renn RTS-01 is designed with integrated heating block that heats up samples during draining to prevent clogging of sediments in system. It comes with a filtration station with a waste bottle and knock out waste bottle to protect the vacuum pump. No rubber or silicon stopper is required for waste disposal.

## Integrated Process.

The Renn RTS-01 is engineered to work hand in hand with STM-03 to allow for a continuous operation mode. The Renn RTS-01 can also be customized for the number of test cells up to 4 places, maximising it's productivity. Work hard? Work smart.

## Technical Specifications

RTS-01 measures sediment up to 0.5%*m/m* and sample viscosities up to 55*m<sup>2</sup>/s*.

Test stations	Three/Four*
Unit Dimension (LxBxH)	400 x 300 x 204 / 570 x 300 x 204 mm*
Unit Weight	21.2 / 24.5 kg*
Test sample size	10g
Filter	47mm dia. glass filter
Waste bottle	4 litres
Knockout waste bottle	2 litres

\*Unit measurements are according to respective models
